COVID-19 TESTING	Applies	Applies	Applies	Unvaccinated staff, faculty and students once a week
TRAVEL	Restricted	Upon approval	Cleared through Covid-19 Status	Unrestricted

COVID-19 Campus Alert Status and Response for 2021-2022

ALERT LEVEL 1

Alert Level 1 (Green)

This is considered the College's COVID-19 "normal" level with vaccines widely available. Here, the College is fully populated with students, faculty and staff and operating with some protocols in place that address the existence of COVID-19. This baseline state of operations may change as the circumstances with COVID-19 improve or if the prevalence of COVID-19 changes on campus, in the region and in the state.

ALERT LEVEL 2

Alert Level 2 (Yellow)

This alert level indicates that operations need to be modified, though the number of individuals testing positive for COVID-19 is still manageable and contact tracing suggests that exposures are confined to a small number of people. Effective contact tracing remains possible, and there is confidence in the ability to contain, isolate and remediate small clusters. Here, the campus continues to be populated with faculty, staff and students with adjustments to baseline operations in order to reduce density and in-person contacts.

ALERT LEVEL 4

Alert Level 4 (Red)

This alert level indicates the need for significantly reducing campus operations to a minimum, with students either operating in a remote learning format on-campus or transitioning to off-campus remote. The College shifts to this alert level when there is ongoing campus or community transmission occurring at an accelerating rate and there are limited strategies to contain or control the spread of COVID-19.
